

Comprehensive DSE solutions

"Cardinus Risk Management has been invaluable in helping us achieve compliance with our health and safety objectives. With ever more obligation being placed upon employers to conform, it's comforting to know that there is both a product and a team of people out there who make doing so as easy as possible. Thank you Cardinus."

John Dignan, OYEZSTRAKER

Managing your DSE risk can be time-consuming and costly. Business pressures often make it difficult to get financial commitment for a DSE programme to keep your employees safe and discomfort free. This lack of support is hard to justify when the benefits of a good DSE programme are considered.

These benefits include:

- Compliance with the Display Screen Equipment regulations.
- A reduction in lost-time productivity.
- Less absenteeism.
- Efficiency and accuracy improvements.

Cardinus Risk Management has spent over 12 years developing a DSE process that delivers measurable results at the lowest cost possible. Innovations in our intervention processes include telephonic and DSE triage services that mitigate risk at the earliest (and therefore cheapest) opportunity. Your employees feel their health and wellbeing is properly invested in.

E-learning and self-assessment

E-learning is widely recognised as the most efficient way of delivering ergonomic assessment and training. Workstation Safety Plus from Cardinus is the world's most widely used DSE risk management software. It saves time and money and it really works.

Workstation Safety Plus specialises in empowering your employees to take ownership of their risk and mitigate it where possible. Using advanced features it provides self-help modules that generate substantial results.

However, where employees cannot manage their own risk, further intervention may be needed.

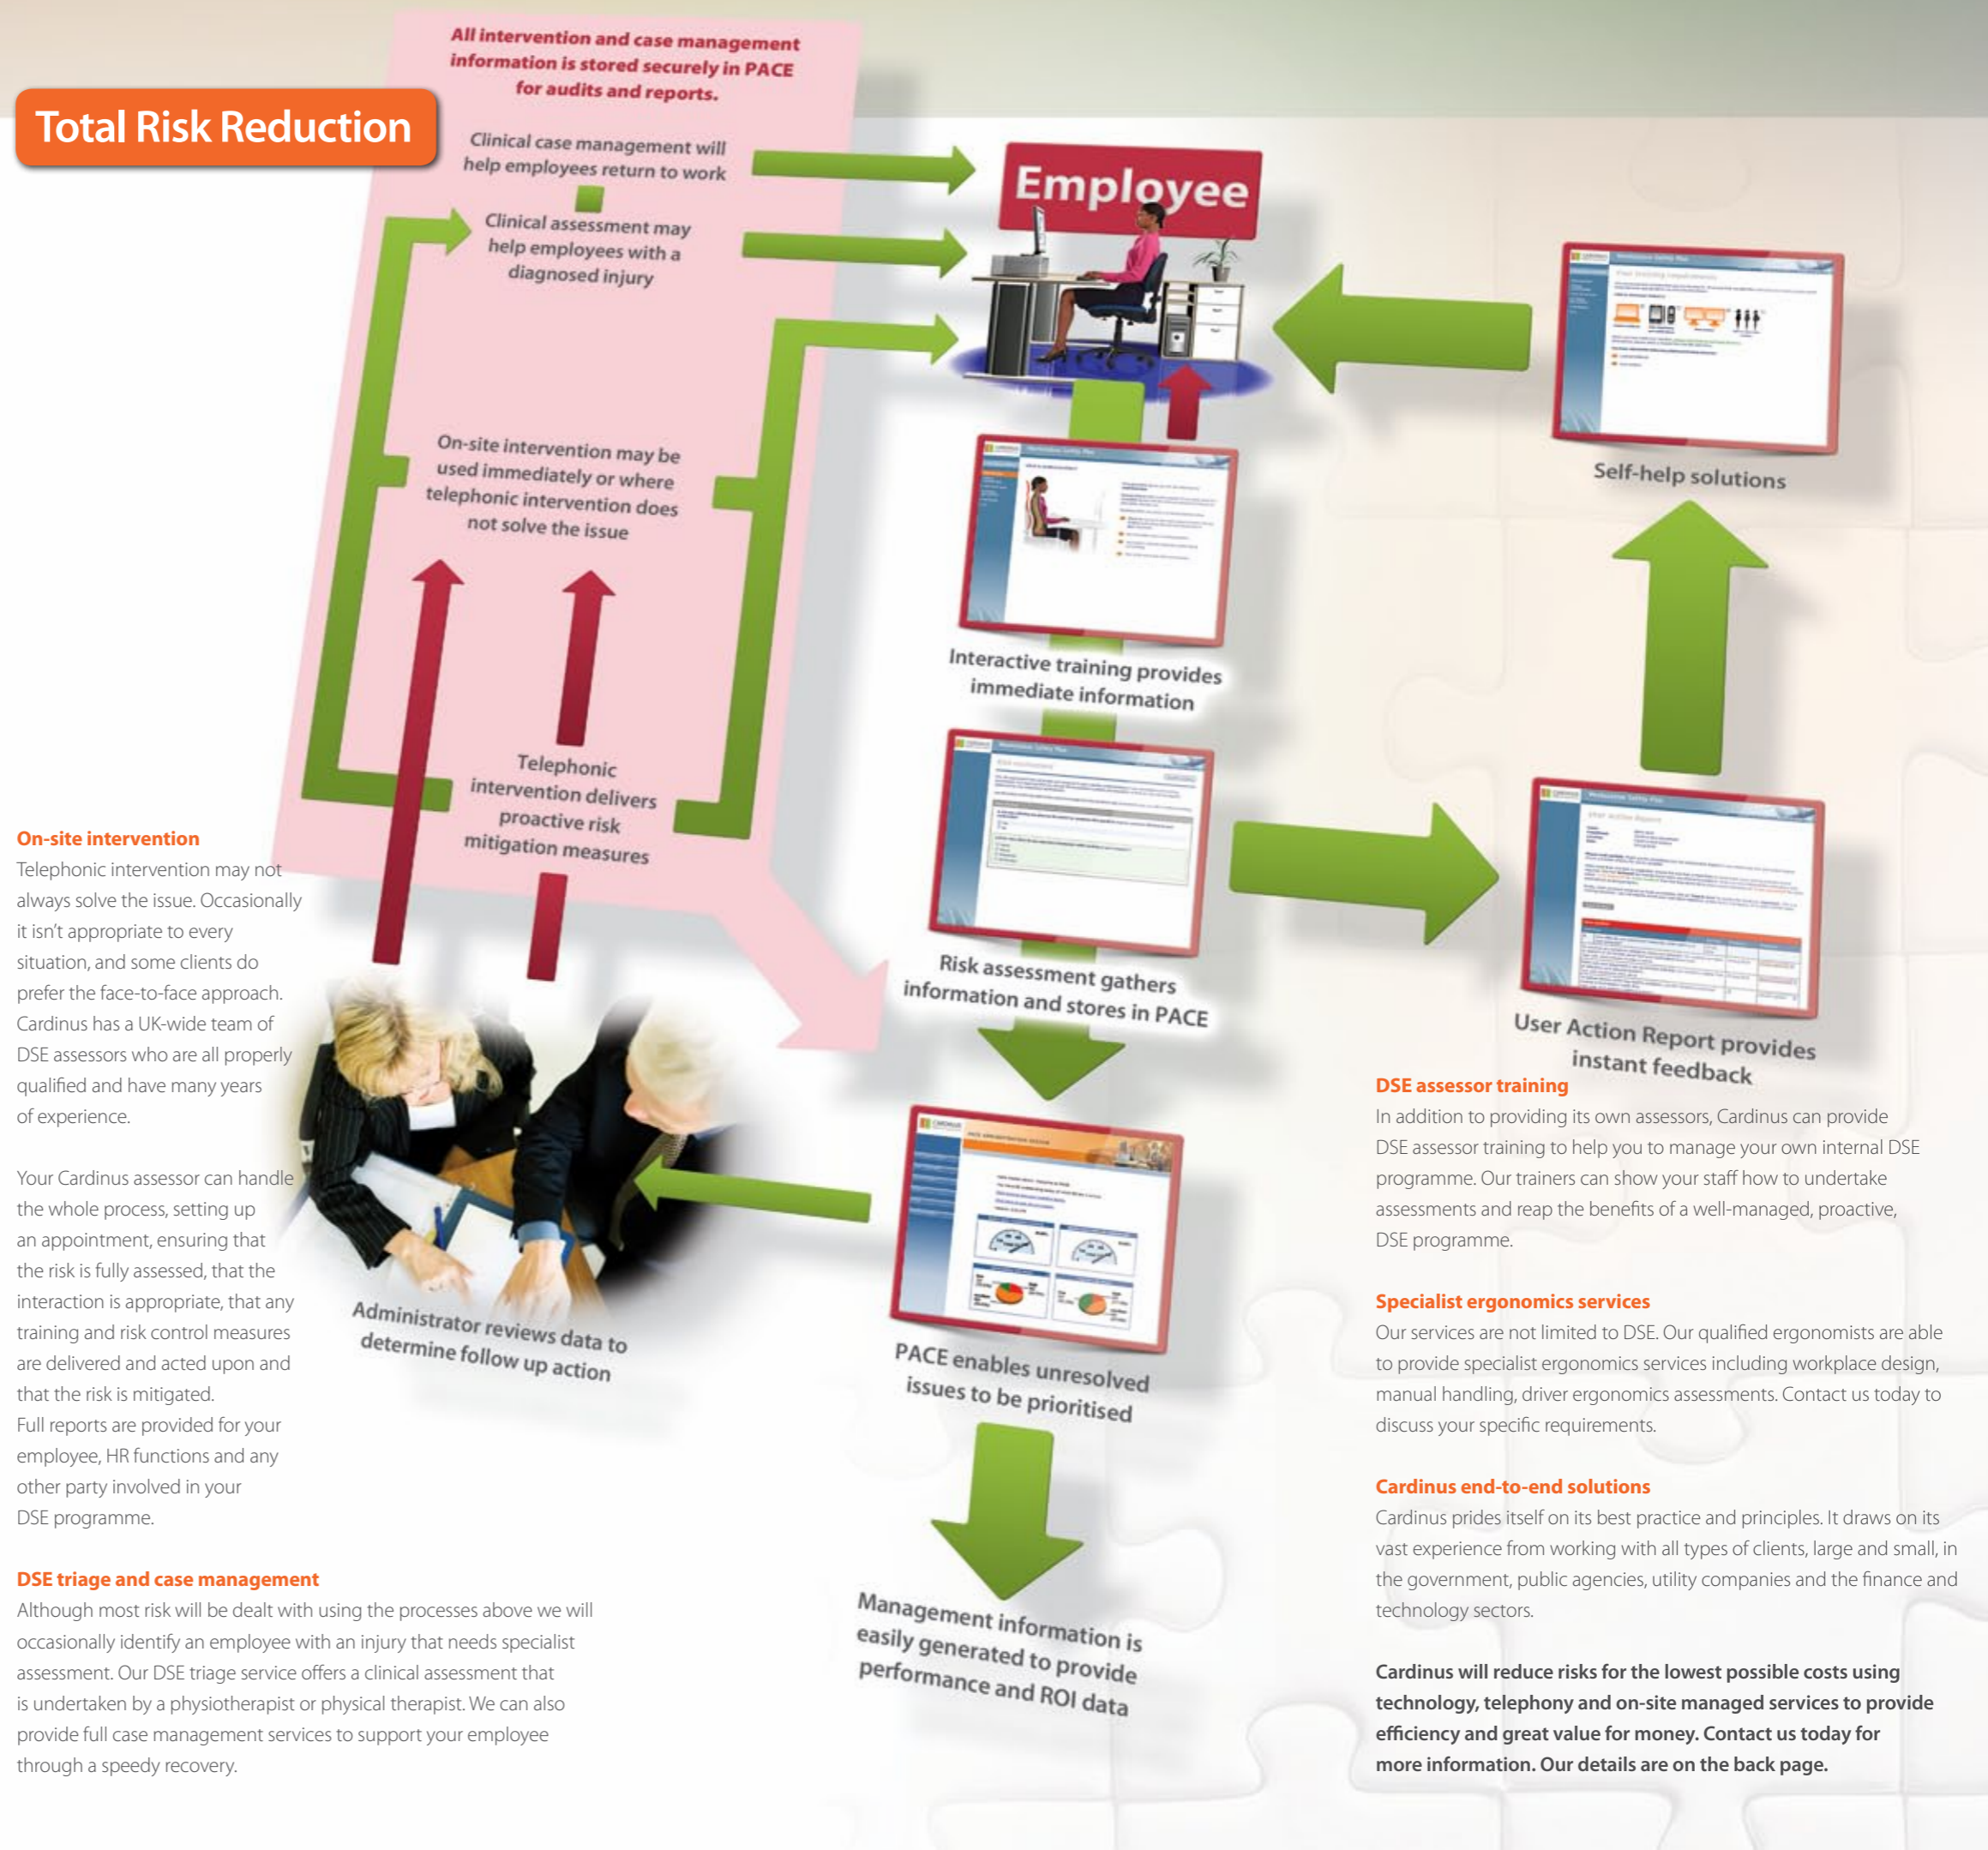

Telephonic intervention

Many companies turn straight to on-site intervention. This is a costly exercise and does not necessarily produce the best results. Cardinus Risk Management has spent many years fine-tuning a telephonic intervention process that delivers incredible results and enjoys the support of employers, employees and unions alike. Cardinus provides this service using its trained experts who have full access to the data gathered during the self-assessment process and understand your situation completely.

Workstation Safety Plus stores all the information entered by your employees in a secure database. Our telephone assessors will analyse the data using the unique Cardinus information management engine, PACE. All telephonic intervention details will also be recorded in PACE, ensuring you have a complete audit trail.

Using their wealth of experience and knowledge, our experts will be able to solve most problems over the telephone at a fraction of the cost of an on-site session.

Total Risk Reduction

On-site intervention

Telephonic intervention may not always solve the issue. Occasionally it isn't appropriate to every situation, and some clients do prefer the face-to-face approach. Cardinus has a UK-wide team of DSE assessors who are all properly qualified and have many years of experience.

Your Cardinus assessor can handle the whole process, setting up an appointment, ensuring that the risk is fully assessed, that the interaction is appropriate, that any training and risk control measures are delivered and acted upon and that the risk is mitigated. Full reports are provided for your employee, HR functions and any other party involved in your DSE programme.

DSE triage and case management

Although most risk will be dealt with using the processes above we will occasionally identify an employee with an injury that needs specialist assessment. Our DSE triage service offers a clinical assessment that is undertaken by a physiotherapist or physical therapist. We can also provide full case management services to support your employee through a speedy recovery.

DSE assessor training

In addition to providing its own assessors, Cardinus can provide DSE assessor training to help you to manage your own internal DSE programme. Our trainers can show your staff how to undertake assessments and reap the benefits of a well-managed, proactive, DSE programme.

Specialist ergonomics services

Our services are not limited to DSE. Our qualified ergonomists are able to provide specialist ergonomics services including workplace design, manual handling, driver ergonomics assessments. Contact us today to discuss your specific requirements.

Cardinus end-to-end solutions

Cardinus prides itself on its best practice and principles. It draws on its vast experience from working with all types of clients, large and small, in the government, public agencies, utility companies and the finance and technology sectors.

Cardinus will reduce risks for the lowest possible costs using technology, telephony and on-site managed services to provide efficiency and great value for money. Contact us today for more information. Our details are on the back page.
