Background

Fire safety training is one of the most important aspects of your safety induction program. Employees who are able to act quickly and decisively when faced by fire can save property and lives.

Fire Safety Plus is one of Cardinus' most established e-learning products and used by many of the worlds largest organisations. This course is fully customisable and can be used to address specific policy information and risks that are specific to you.

Fire Safety Plus is highly interactive. It contains a number of tests and quizzes designed to ensure your employees complete the course with good knowledge retention and an understanding of how they should act in the case of an emergency.

Fire Safety Plus can be installed onto your corporate intranet or delivered over the internet using Cardinus' secure hosting service.

Management features

Fire Safety Plus is fully supported by PACE, Cardinus' powerful management module. Features include:

- Tools to monitor training records and identify your employees who have successfully completed their training. PACE will also identify your employees who have not started or not completed their training.
- Advanced automated email capability to encourage participation.
- Charting and sophisticated statistical reporting.
- Fully SCORM compliant.

OBJECTIVES

On completion of *Fire Safety Plus* delegates will be able to:

- Understand the potential causes of fire.
- Understand how a fire can propagate.
- Appreciate how to raise the alarm should they discover a fire.
- Understand how a fire can be safely extinguished
- Appreciate the role played by human behaviour in responding to a fire.
- Understand the role of fire marshals.
- Recognise the means of escape available as exit routes in the event of a fire.
- Understand the need for good housekeeping to reduce this risk of fire.
