Service overview

This service will help you develop, implement and maintain an assessment process that reflects your organisational culture. Alternatively Cardinus can carry out assessments on your behalf.

To manage the risks to the health and safety of your employees it is essential to carry out a risk assessment of the activities that are part of your business. This assessment will then form the basis on which appropriate control measures are selected. In the UK and other EU states it is a legal requirement to carry out these assessments and where a significant risk is identified a written record must be retained.

In addition to general risk assessments the programme can include specific assessments of the following:

- Hazardous substances (COSHH).
- Workplace assessment if not covered in the overall programme.
- Noise.
- Individual workstation assessments.
- Individual manual handling assessments.

Cardinus also offer on-line systems for carrying out training and assessment of workstation and manual handling operations..

OBJECTIVES

The objectives of this service are to develop and implement a system to:

- Identify activities which have the potential to cause injury or ill-health
- Identify the hazards associated with these activities
- Identify those groups at risk, including special groups such as young persons.
- Evaluate the potential severity of the impact and the likelihood of it occurring
- Select appropriate controls to eliminate or reduce the risk
- Develop a programme to educate employees about the risks and controls
- Implement a review process

PROCESS

The stages of our service are:

1. Define the initial scope of the assessment project
2. Identify the activities which are to be assessed
3. Identify and record the hazards associated with each activity
4. Design an appropriate system for estimating severity and likelihood
5. Train selected risk assessors or carry out assessments
6. Identify where more specific assessments, e.g. noise, COSHH, display screen, are required
7. Develop action plan where the assessment identifies inadequate controls following the standard hierarchy of controls
8. Develop training programme for employees carrying out the activities
9. Agree procedures for the review of assessments
