	• Electronic Key Cards	• HVAC System Checks	
	• Car Parking Provisions	• IT System Checks	

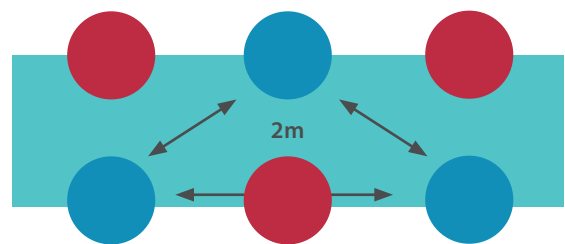

First Aid in the Workplace Considerations:

- Staff who have tested positive for COVID-19 to wear a bracelet/badge or carry a medical card. Similar to people with an existing medical condition, e.g. allergy bracelet
- Guidance for cardiac arrest situations
- PPE disposal and equipment decontamination

Car Parking Considerations:

- Color coding bays or parking permits for different days or arrival/dept times
- Disinfecting car park-related structures (buttons, speakers)

Office/Meeting Room Considerations:

Multi-Tenure Premises Considerations:

Recommended that a 'Building Responsible Person' Team is formed (if not already in place). This will aid in the coordination of multiple organizations with the safety and security of their people and central building services.
