

E-Learning from Cardinus Risk Management

The cost-effective way to manage your safety risk. The Cardinus's suite of e-learning courses offers a cost-effective and efficient way to support a powerful, results-driven risk management programme.

The modular format to our courses allows employees to complete the training at their own pace. The courses feature engaging graphics and interactive sequences with tests and quizzes. This ensures delegates have a good understanding of the subject and an ability to adopt their new skills.

Healthy Working (DSE Management)

By completing Healthy Working e-learning, your employees will understand the risks associated with using computers and other devices such as tablets and smartphones. It teaches healthy use of technology at work, at home and on the move. Healthy Working delivers e-learning that is tailored to the needs of each individual employee through a number of variants including laboratories, homeworking, DSE Assessors and more.

Fire Safety Plus

Use Fire Safety Plus to ensure all employees know how to identify and minimise fire hazards, to understand regulations, evacuation procedures, survival techniques and basic first-aid provision.

Safe Driving Plus

Safe Driving Plus teaches drivers how to stay safe using defensive driving techniques. It helps identify and minimise drivers' risk, reinforces fleet policies and results in behaviour change. There is also a variant for truck drivers completely re-engineered to meet the demands of LGV/truck drivers.

Safety Climate Tool

Developed by the Health and Safety Laboratory and available through Cardinus, this tool allows you to measure the opinions and attitudes towards health and safety in your organisation. Data can be used for benchmarking against other organisations.

Manual Handling Plus (office and industrial editions)

Encouraging measurable behaviour change through engaging graphics and interactive sequences. The course is available in two formats, a workplace and office edition.

Managing Stress at Work

Ensure your supervisors and managers understand the causes of stress. This knowledge will help improve morale and attendance while reducing lost time productivity.

Environmental Essentials

This course will support ISO 14001 certification. On completion, employees make a pledge to put their knowledge in to action and take away tips on how to reduce their carbon footprint.

Safety for Line Managers

Line managers are one of the first lines of defence when it comes to health and safety management. Safety for Line Managers can be used as a standalone solution but is most powerful when used alongside Health and Safety Induction.

Health and Safety Induction

Designed with your office-based staff in mind, it can be used as a standalone solution but when it is used alongside Safety for Line Managers it becomes a powerful tool to encourage a safety culture across your entire organisation.

THE COST-EFFECTIVE WAY TO MANAGE YOUR SAFETY RISK

Health and Safety Essentials

The simple, easy way to introduce staff to basic health and safety concepts, create awareness of hazards and improve safety, using quizzes, animations and interactive sequences.

Fraud

Sometimes a simple favour can be construed as fraud and everyone is at risk. This course sets out the responsibilities of all staff and suppliers with regard to fraud prevention, what to do if fraud is suspected and the action that will be taken by management.

Data Protection

The personal data of employees, suppliers and customers is protected by law. Simply forwarding an email can breach data protection law if that email contains personal information. This course helps staff to understand their obligations if a organisation wants to avoid costly legal action.

Security Awareness

It is important your staff understand any security threat to the organisation. This course will help protect your people, your property and your data using a combination of information, interactive sequences and tests and quizzes.

Effective Risk Assessment

This informative course demonstrates why risks need to be addressed in a methodical way to provide a consistent and effective method of control. Training covers the theory of risk control and how to accommodate human factors such as knowledge and experience.

Diversity and Inclusion

The issues surrounding age, disability, gender, race and sexual orientation can be complex and difficult to address. Through this course employers are recognising the positive benefits that can be achieved in terms of compliancy, morale and productivity.

PACE

All Cardinus e-learning is supported by PACE, a unique workflow and information management system. PACE provides clients with a secure database and powerful workflow and task management tools to ensure that all risk management activity is managed in the most efficient manner. PACE provides all the evidence required to demonstrate diligence and compliance.
